Summary

Software Developer with **more than a year of experience** in Frontend Development and **Proficient English**. Have extensive experience working with **React/Redux, JavaScript, Typescript, HTML, CSS, SASS, React libraries, SQL and Node.js**. Developed several projects, also eager to learn new technologies (**React Native, Angular, Vue**).

Moreover, I am working on my **Master's Degree in Computer Science** and thesis about the **Implementation and Analysis of Inter-Service Authorization and Authentication Systems in Microservices Architecture**.

Now I am implementing all **my expertise and experience** to create high-performance web products and looking for professional opportunities where I will make a great impact using the latest technology stack and well-developed soft skills.
